Received 30 September 2011; revised 10 January 2012; accepted for publication 20 January 2012

It is important that taxonomic knowledge is disseminated by those who possess it. This can be carried out via online databases, printed publications or training in taxonomic practice. For Annonaceae, the online database *AnnonBase* includes all published names of Annonaceae at any rank worldwide. Recently, an updated index to genera, species and infraspecific taxa of Neotropical Annonaceae was published in hard copy. This manuscript contains a concise update to the *Bibliography of Annonaceae* published by the late E. A. Mennega in 1993. Since his publication, much work has been carried out on systematics and evolution of Annonaceae, with the advent of molecular phylogenetics providing an additional stimulus. Here, however, we concentrate only on taxonomic papers focusing specifically on the description and circumscription of taxa (e.g. revisions, monographs, floras, checklists, descriptions of new species or phylogenetic studies that show monophyly/polyphyly/paraphyly of genera). The index should provide an easy entrance into the most important taxonomic literature on Annonaceae from 1900 onwards for the trained and untrained taxonomist with an interest in Annonaceae. *Botanical Journal of the Linnean Society*, 2012, **169**, 41–73.

ADDITIONAL KEYWORDS: dissemination – outreach – taxonomic impediment – taxonomic literature.

INTRODUCTION

Many conservation, environmental, legal and other matters hinge on scientific names, including their status, and thus on taxonomy (Scotland *et al*., 2003; Chase *et al*., 2011; Crouch & Smith, 2011; McNeely, 2011). It also becomes increasingly clear that biodiversity is a resource which can be tapped to enhance human welfare (Wilson, 2000; Scotland *et al*., 2003; Blackmore, Gibby & Rae, 2011; Wyse Jackson & Sharrock, 2011). Unfortunately, many natural history collections worldwide are being closed down or budgets are being cut (Dalton, 2003; Gropp, 2003), a recent example being the closure of one of the most modern herbaria in the world, that of Utrecht University (Erkens & Baas, 2008). As a result, at many universities no new generation of systematists can be trained (Gropp, 2003) and the question presents itself: will there be sufficient knowledge of biodiversity to be able to tap it in the future?

An example of this supposed trend is that some feel there are too few practising taxonomists around to assist molecular systematists to interpret their phylogenetic trees (Sanders & Judd, 2000; Smith, 2006). As a result, harmonizing these trees with existing classification hypotheses or translating them into usable new classifications (as carried out by, e.g. Christenhusz *et al*., 2010; Lehtonen *et al*., 2010; Wang *et al*., 2010; Zhou *et al*., 2010; Chatrou *et al*., 2012) could become problematic (Sanders & Judd, 2000; Smith, 2006). The gap between molecular systematists and taxonomists

†Deceased

might widen as new generations of students receive less and less training in the full complement of systematic methods (Sanders & Judd, 2000). Within a few years many 'old school' taxonomic specialists will retire, taking with them their vast body of knowledge. Unfortunately, most of it is so-called 'tacit knowledge' (personal knowledge that is difficult to communicate; Polanyi, 1966) and can only be transferred by working alongside these specialists. If this knowledge is lost, it will take a disproportionate future investment to relearn it (Godfray, 2002).

These examples illustrate why some perceive taxonomy to be in crisis because of a lack of prestige and resources, and why they feel this is crippling the continuing cataloguing of biodiversity (Gaston & May, 1992; Ellis, 2002; Godfray, 2002; Hopkins & Freckleton, 2006; Boero, 2010; Ebach, Valdecasas & Wheeler, 2011). It must be noted, however, that others contradict this view (Scotland *et al*., 2003; Joppa, Roberts & Pimm, 2011). Joppa *et al*. (2011) especially argue fiercely against the thesis that taxonomy is in crisis and taxonomists are becoming endangered. In a quantitative analysis, they show that conventional wisdom might not be the best source for such statements (Joppa *et al*., 2011). They demonstrate that, for plants and other taxa, the rate of species description and the number of taxonomists have increased essentially exponentially since approximately 1950. Whatever the current situation, it is clear that an effort to disseminate and open up taxonomic knowledge to non-specialists is important, irrespective of the direction the specialist/non-specialist ratio will develop in the future.

DISSEMINATION OF TAXONOMIC KNOWLEDGE IN ANNONACEAE: SOME EXAMPLES

It is important that taxonomic knowledge is disseminated by those who possess it, and nowadays this is often carried out via online databases, as in the case for Annonaceae. *AnnonBase* (Rainer & Chatrou, 2006) is a source database for the *Species 2000* and *ITIS Catalogue of Life* databases, but it can also be accessed directly online (http://www.annonaceae.org). *AnnonBase* includes all published names of Annonaceae at any rank worldwide. It serves as a concise taxonomic backbone for basic and applied scientific studies. The *AnnonBase* source database also includes references to type material and its location. A more recent initiative is the *AfroAnnon* website (http://afroannons.myspecies.info), the goal of which is to disseminate and share knowledge about African Annonaceae. That this initiative is warmly welcomed can be seen by the fact that the website attracted *c*. 1000 unique hits in its first 6 months online. The page was built using the *scratchpad* technology (http://scratchpads.eu/), which is specifically meant to boost interactive use of taxonomic information across the world. Of course, Annonaceae are not the only family for which such initiatives have been taken. Two other examples are the *World Checklist of Palms* (Govaerts & Dransfield, 2005) integrated into the *RBG Kew World Checklist* (http://apps.kew.org/wcsp/home.do) and *Lecythidaceae Pages* (Mori *et al*., 2010).

More traditional means of disseminating taxonomic information are printed publications (e.g. checklists: Maas & Rainer, 1997; Press, Shrestha & Sutton, 2000; Murillo, 2001; Klopper *et al*., 2006; León & Monsalve, 2006; Johnson *et al*., 2008; nomenclatural: Maas *et al*., 2011; keys: Couvreur *et al*., 2012). Nowadays, many online databases are presented as a replacement for printed versions and, from an economic perspective, this might seem reasonable. However, from a practical taxonomic standpoint, this does not always make sense. Taxonomy is a hands-on science and, as long as this is the case, tools should be chosen accordingly. It is clear that not everywhere people are equipped with similar (digital) resources. Especially in less developed countries, many herbaria still have no or only limited access to the Internet. When they do it is often not in the herbarium itself but in offices, and it can be impractical to move between the office and herbarium. Therefore, it was decided to publish an updated index to genera, species and infraspecific taxa of Neotropical Annonaceae on paper (Maas *et al*., 2011), especially because the earlier version (Maas, Mennega & Westra, 1994) was recognized for its practicality and usefulness. New data retrieved when constructing this new index have been entered into *AnnonBase* so that these two publications are in line with each other.

The above examples describe dissemination of taxonomic knowledge. However, knowledge of taxonomic practice should also be distributed. Nowadays, many non-taxonomists use data on species for their research. For instance, chemists screen plants for chemical constituents and publish their results, but they may lack the taxonomic skills to do this effectively. Explaining taxonomic practice to such groups, as was recently done for instance by Erkens (2011), is also a vital part of the outreach that taxonomists should perform. The index presented in this manuscript is an example of such a taxonomic service, providing an easy entrance into the most important literature on Annonaceae from 1900 onwards.

THE INDEX

The basis of the index presented here was compiled by Mennega at the Nationaal Herbarium Nederland –

Utrecht University branch (NHN-U). He collected this literature throughout his many years of work on Taxonomic Literature 2 (Stafleu & Mennega, 1992) and published this for Annonaceae specifically in his *Bibliography of the Annonaceae* (Mennega, 1993) a few years before his death in 1998. This work was amended and an updated bibliography was presented on two CDs (Bakker, 2001a, b). Since then much work has been carried out on systematics and evolution of Annonaceae, with the advent of molecular phylogenetics providing an additional stimulus. Therefore, we feel it is time to present a concise update of the *Bibliography*. Unfortunately, an update with all published works since 1993 is unfeasible at this moment. Therefore, as selection criterion we have used two rules: firstly taxonomic literature only is presented and, secondly, only those publications that have the description and circumscription of taxa as their core are listed. This means revisions, monographs, floras, checklists (if they are more than merely a list of names), descriptions of new species and phylogenetic studies that demonstrate monophyly/polyphyly/paraphyly of taxa are included. This approach means that we exclude many useful works (such as checklists or studies that examine character evolution). Furthermore, if multiple editions of a work exist, only the most recent is mentioned. We chose the year 1900 as a starting point, and the reason is twofold: firstly, because by that time generic concepts in Annonaceae were ostensibly evolving towards the concepts of the present day and, secondly, because at that time Engler & Diels had published their important treatments on African Annonaceae (Engler & Diels, 1900, 1901). We include a few older publications that we think are still important, but in general the reader is referred to Mennega (1993). This index, in other words, is not meant to be comprehensive, but it should rather serve as an easy entrance into the most important literature (602 works are listed) for those who are not well acquainted with taxonomy of Annonaceae.

The index consists of two lists: the generic reference list (Appendix 1) and the literature reference list (Appendix 2). Taxonomic publications are cited in the literature reference list. Genera treated in any given paper are cited by a number. This number can be looked up in the generic reference list. Here, one can also see if the generic name is still accepted or else find the currently accepted name. Be aware, though, that the circumscription of a given genus may have changed over the years as a result of later taxonomic insights! The exact date of issue of the part of a periodical or book was used as far as possible. This date may differ from that printed on the title page of the publication (especially in older works). Both lists are cross-referenced. One can enter via the generic reference list and find literature on a particular genus or enter via the literature reference list and see which genera are cited in a publication.

Although the present index has been thoroughly checked, the authors are fully aware that it still may contain various errors and omissions. Any comments and corrections will therefore be greatly welcomed.

ACKNOWLEDGEMENTS

Thomas Couvreur and David Johnson are thanked for their supportive reviews that improved the manuscript substantially. Richard Saunders contributed to an earlier version with several additions to the Asian Annonaceae literature. Lars Chatrou made valuable comments on the introduction and the generic reference list. R.H.J.E. was supported via the Innovational Research Incentives Scheme (VENI, nr. 863.09.017; NWO-ALW, The Netherlands).

APPENDIX 1

GENERIC REFERENCE LIST

Currently accepted names are printed in bold face. Names not printed as such are synonyms, with a reference to a currently accepted name. This is only meant as quick reference and is not a full taxonomic reference (for a more elaborate discussion, also see Couvreur *et al*., 2012). One general paper that con-

tains almost all genera has been added without references to the genera [Chatrou *et al*., 2012 (56)]. This paper describes (new) subfamilies and (new) tribes currently accepted in Annonaceae and therefore represents an important taxonomc framework for future work in Annonaceae.

Specific nomenclatural information can be retrieved via the online database *Annonbase* (Rainer & Chatrou, 2006) at http://www.annonaceae.org. Numbers correspond to the order in the literature reference list.

179 *Sphaerothalamus* Hook.f., now in **Polyalthia** (118; 119; 211; 243; 356; 418)

180 ***Stelechocarpus*** (Blume) Hook.f. & Thomson (20; 26; 63; 85; 86; 89; 118; 119; 134; 178; 211; 236; 241; 243; 244; 246; 302; 356; 413; 429; 500; 503; 505; 557)

181 ***Stenanona*** Standl. (154; 162; 178; 181; 183; 211; 236; 494; 496; 599)

182 *Stenanthera* Engl. & Diels, now in ***Neostenanthera*** (17; 67; 104; 107; 113; 118; 119; 410; 515)

183 *Stormia* S.Moore, now in ***Cardiopetalum*** (118; 119)

184 *Tabraca* Noronha (application uncertain) (178)

185 ***Tetrameranthus*** R.E.Fr. (55; 160; 177; 178; 211; 236; 274; 285; 359; 382; 412; 524; 564; 588)

186 *Tetrapetalum* Miq., now in ***Cyathostemma*** (118; 119; 178; 211; 236; 243; 332; 356; 418; 502; 551)

187 *Tetrastemma* Diels, now in ***Uvariopsis*** (104; 107; 211; 440; 441; 515)

188 *Thonnera* De Wild., now in ***Uvariopsis*** (19; 38; 211; 515)

189 ***Thoreldora*** Pierre (**Rutaceae**)

190 ***Toussaintia*** Boutique (19; 38; 39; 100; 113; 178; 211; 236; 256; 261; 569; 570)

191 ***Tridimeris*** Baill. (118; 119; 154; 178; 211; 236; 490)

192 ***Trigynaea*** Schltdl. (55; 96; 118; 119; 143; 154; 163; 178; 211; 214; 220; 222; 236; 243; 274; 353; 382; 450; 452; 453; 561; 564)

193 *Trigyneia* Rchb., now in ***Trigynaea***

194 ***Trivalvaria*** (Miq.) Miq. (20; 26; 45; 63; 93; 118; 119; 178; 196; 211; 236; 246; 269; 302; 343; 498; 505; 560; 594)

195 *Unona* L.f., now in ***Ambavia***, ***Annickia***, ***Artabotrys***, ***Asimina***, ***Asteranthe***, ***Cananga***, ***Cardiopetalum***, ***Cleistochlamys***, ***Cymbopetalum***, ***Dasymaschalon***, ***Desmopsis***, ***Desmos***, ***Duguetia***, ***Friesodielsia***, ***Goniothalamus***, ***Guatteria***, ***Haplostichanthus***, ***Maasia***, ***Marsypopetalum***, ***Meiocarpidium***, ***Meiogyne***, ***Mitrella***, ***Mitrephora***, ***Monanthotaxis***, ***Monodora***, ***Phaeanthus***, ***Polyalthia***, ***Popowia***, ***Sapranthus***, ***Uvaria*** and ***Xylopia*** (37; 40; 66; 74; 75; 104; 112; 113; 117–119; 134; 135; 192; 193; 195; 204; 227; 243; 244; 305–309; 311; 373; 385; 396; 413; 415–419; 422; 424; 436; 457; 533)

196 ***Unonopsis*** R.E.Fr. (31; 55; 90; 91; 103; 110; 143; 145–147; 151; 157; 158; 160–164; 166; 172; 174; 176; 178; 181; 183; 208; 211; 214; 236; 274; 276; 284; 285; 294; 353; 359; 382; 412; 450; 457; 468; 469; 490; 493; 494; 514; 516; 518; 520; 521; 524; 561; 564; 599)

197 *Uva* Kuntze, now in ***Anonidium***, ***Cymbopetalum***, ***Desmos***, ***Fitzalania***, ***Monanthotaxis***, ***Pseuduvaria***, ***Trigynaea***, ***Uvaria*** and ***Uvariodendron***

198 ***Uvaria*** L. (2–5; 9–20; 22; 26; 30; 35; 38–40; 43; 45; 48; 62–67; 74; 75; 89; 92; 104–107; 109; 112; 113; 115–119; 125–128; 131; 134; 135; 143; 148; 149; 151; 178; 182; 184; 191–196; 199; 200; 203; 204; 210–213; 224–227; 229; 230; 236; 241; 243; 244; 252; 260; 261; 266; 268; 269; 298–300; 303–305; 311; 315; 318; 319; 323; 327; 330; 332; 343; 356; 361; 364; 366–369; 373; 375–377; 379; 396; 405; 410; 411; 413; 415; 417; 418; 425; 429; 434; 436–439; 449; 495; 498; 500; 502; 503; 505; 515; 533; 535–538; 551; 553; 569; 570; 574; 578; 582; 590; 592; 595; 600–602)

199 ***Uvariastrum*** Engl. (3; 17; 19; 38; 39; 92; 104; 119; 178; 198; 199; 211–213; 228; 230; 231; 236; 261; 364; 367; 377; 410; 438; 515; 535; 569; 590)

200 *Uvariella* Ridl., now in ***Uvaria***

201 ***Uvariodendron*** (Engl. & Diels) R.E.Fr. (17; 19; 38; 92; 125; 127; 131; 153; 178; 198; 199; 211–213; 231; 236; 257; 261; 364; 367; 438; 566; 569; 571)

202 ***Uvariopsis*** Engl. (2; 4; 19; 38; 72; 92; 116; 118; 119; 178; 182; 186; 198; 199; 211–213; 228; 231; 236; 253; 261; 364; 367; 438; 440; 441; 484; 515; 535; 569; 571; 590)

203 *Waria* Aubl., now in ***Xylopia***

204 *Woodiella* Merr., now in ***Woodiellantha*** (8; 178; 211; 295; 302; 323)

205 ***Woodiellantha*** Rauschert (236; 296; 409)

206 ***Xylopia*** L. (2; 4; 6; 7; 10; 11; 13; 15; 17; 19; 21; 26; 30–32; 34; 37–40; 45–48; 55; 63; 65; 67; 68; 89–92; 96; 101–104; 107–109; 113; 115–119; 125–128; 131; 132; 134; 135; 143–145; 147; 148; 150; 153–155; 157; 158; 160; 161; 163–167; 170; 172; 174; 177; 178; 181–183; 192; 193; 198; 199; 203; 204; 210–214; 224; 231; 232; 236; 240; 241; 243; 244; 246; 249; 261; 266; 269; 270; 274–277; 281–285; 302; 305; 318; 332; 334; 340; 353; 356; 359; 364; 367–369; 371; 375–377; 382; 385; 386; 390; 393–395; 410–413; 417; 418; 432; 437; 438; 447; 469; 474; 484; 490; 492; 494; 495; 498; 502; 503; 505; 512–516; 519–521; 524; 535; 548; 553; 561; 564; 569; 570; 590; 592; 593; 595; 597; 599)

207 *Xylopiastrum* Roberty, now in ***Uvaria*** (19)

208 *Xylopicron* Adans., now in ***Xylopia***

209 *Xylopicrum* P.Browne, now in ***Xylopia***

APPENDIX 2

Literature reference list

Numbers behind reference in parentheses correspond to the order in the generic reference list.

1) **Acevedo-Rodríguez P. 1996.** Flora of St John, U.S. Virgin Islands. Memoirs of the New York Botanical Garden **78:** 66–69. (010)

2) **Adam JG. 1971.** Flore descriptive des Monts Nimba (1ère partie). Mémoires du Muséum National d'Histoire Naturelle. Série B. Botanique **20:** 205–232; pl. 201–219. (015, 035, 059, 062, 069, 090, 118, 125, 135, 148, 150, 151, 198, 202, 206)

3) **Adam JG. 1971.** Flore descriptive des Monts Nimba (2ème partie). Mémoires du Muséum National d'Histoire Naturelle. Série B. Botanique **22:** 881–884; pl. 326–327. (151, 198, 199)

4) **Adam JG. 1975.** Flore descriptive des Monts Nimba (3ème partie). Mémoires du Muséum National d'Histoire Naturelle. Série B. Botanique **24:** 1067–1068; pl. 1660–1662. (198, 202, 206)

5) **Adam JG. 1975.** Flore descriptive des Monts Nimba (4ème partie). Mémoires du Muséum National d'Histoire Naturelle. Série B. Botanique **25:** 1488; pl. 1769. (069, 125, 150, 198)

6) **Adam JG. 1981.** *Flore descriptive des Monts Nimba (5ème partie)*: 1731–1732; pl. 958–961. Éditions du centre national de la recherche scientifique: Paris. (015, 035, 062, 090, 125, 206)

7) **Adams CD. 1972.** *Flowering plants of Jamaica*: 277–280. University of West Indies: Mona (Jamaica). (010, 133, 206)

8) **Airy-Shaw HK. 1939.** Additions to the flora of Borneo and other Malay Islands: XII. The Annonaceae of the Oxford University Expedition to Sarawak, 1932. Bulletin of Miscellaneous Information **1939:** 275–290. (015, 052, 053, 061, 066, 074, 113, 124, 134, 148, 151, 158, 204)

9) **Alston AHG. 1938.** *The Kandy flora*: 1–2; figs 2–6. Government Press: Colombo. (027, 039, 074, 110, 198)

10) **Anderson JAR. 1963.** The Flora of the Peat Swamp Forests of Sarawak and Brunei, including a catalogue of all recorded species of flowering plants, ferns and fern allies. Gardens' Bulletin. Straits Settlements, Serie 3 **20:** 148–151. (015, 039, 052, 066, 074, 108, 112, 148, 160, 198, 206)

11) **Andrews FW. 1950.** *The flowering plants of the Anglo-Egyptian Sudan 1*: 2–7. T. Buncle & Co. Ltd: Arbroath (Scotland). (010, 062, 087, 104, 118, 151, 198, 206)

12) **Anonymous. 1982.** *Flora of Guizhou. 1*: 269–278. Guizhou Botanical Research Institute:

[Chinese with Latin names]. (015, 048, 066, 110, 113, 198)

13) **Anonymous. 1982.** *Iconographia cormophytorum sinicorum, Suppl. 1*: 514–542. Scientific Publishing House: Beijing. [Chinese with Latin names]. (004, 007, 010, 015, 027, 040, 043, 048, 066, 074, 105, 109, 110, 113, 127, 132, 142, 148, 151, 158, 166, 171, 198, 206)

14) **Anonymous. 1983.** *Iconographia cormophytorum sinicorum 1*: 805–814, 1009–1011; pl. 1609–1627. Scientific Publishing House: Beijing. [Chinese with Latin names]. (004, 007, 010, 015, 031, 043, 048, 066, 074, 109, 110, 113, 132, 148, 151, 171, 198)

15) **Ast S. 1938.** Annonaceae. In: Lecomte H, ed. *Flore générale de l'Indo-Chine 1 (suppl.)*. Paris: Muséum National d'Histoire Naturelle. 59–123; figs 127–110. (004, 007, 010, 011, 015, 027, 039, 040, 043, 048, 057, 074, 106, 110, 113, 132, 134, 148, 151, 162, 198, 206)

16) **Attanayake AMAS, Turner IM, Saunders RMK. 2011.** Two new species of *Uvaria* (Annonaceae) from Borneo, with a new nomenclatural combination. Novon **21:** 161–168. (198)

17) **Aubréville A. 1936.** *La flore forestière de la Côte d'Ivoire 1*: 95–123; pl. 29–42. Larose Éditeurs: Paris. (035, 059, 087, 090, 118, 135, 144, 148, 182, 198, 199, 201, 206)

18) **Aubréville A. 1950.** *Flore forestière Soudano–Guinéenne*: 37–43; pl. 1–2. Société d'éditions Géographique, Maritime et Coloniale: Paris. (010, 087, 118, 198)

19) **Aubréville A. 1959.** *La flore forestière de la Côte d'Ivoire, ed. 2, 1*: 119–154; pl. 31–45. Centre technique forestier tropical: Nogent sur Marne. (002, 010, 012, 015, 019, 026, 035, 046, 059, 062, 064, 073, 087, 090, 104, 111, 115, 117, 118, 125, 134, 135, 144, 148, 150, 151, 188, 190, 198, 199, 201, 202, 206, 207)

20) **Backer CA, Bakhuizen van den Brink Jr. RC. 1963.** *Flora of Java 1*: 100–116. Wolters–Noordhoff N.V.: Groningen. (004, 007, 010, 011, 015, 027, 039, 040, 048, 066, 074, 103, 105, 110, 112, 113, 132, 134, 146, 148, 149, 151, 158, 171, 180, 194, 198)

21) **Bagstad KJ, Johnson DM. 1999.** Taxonomy of *Xylopia barbata* (Annonaceae) and related species from the Amazon/Orinoco Region. Contributions from the University of Michigan Herbarium **22:** 21–28. (206)

22) **Bailey FM. 1899.** *The Queensland flora, Part 1*: 20–26. H.J. Diddams & Co.: Brisbane. (008, 027, 067, 084, 107, 113, 148, 171, 198)

23) **Bamps P, Le Thomas A. 1989.** L'identité d'*Artabotrys rhopalocarpus* Le Thomas, Annonacée africaine. Bulletin du Museum National d'Historie Naturelle: Miscellanea **11:** 455–457. (015)

24) **Bân NT. 1975.** *Enicosanthellum* Ban – novyi rod sem. Annonaceae Juss. (A new genus of the Annonaceae Juss. – *Enicosanthellum* Ban.). Botanicheskii Zhurnal. Moscow & Leningrad **60:** 808–812. [Russian]. (060)

25) **Bân NT. 1975.** Zametki o rode *Dasymaschalon* (Hook.f. et Thoms.) Dalle Torre et Harms (Annonaceae). (Notes on the genus *Dasymaschalon* (Hook.f. et Thoms.) Dalle Torre et Harms (Annonaceae)). Botanicheskii Zhurnal. Moscow & Leningrad **60:** 223–233. [Russian]. (043)

26) **Bân NT. 2000.** *Flora of Vietnam 1. Annonaceae Juss*. Science & Technics Publishing House: Hanoi [Vietnamese]. (004, 007, 010, 011, 013, 015, 027, 039, 040, 042, 043, 048, 052, 053, 057, 058, 060, 061, 066, 069, 074, 093, 103, 105, 106, 108, 110, 112, 113, 116, 124, 127, 131, 132, 136, 141, 142, 146, 148, 149, 151, 158, 160, 166, 172, 175, 180, 194, 198, 206)

27) **Barker HD, Dardeau WS. 1930.** *La flore d'Haiti*: 118–119. Haiti: Port-au-Prince. (010, 027, 080, 133, 167)

28) **Bennet SSR. 1979.** *Flora of Howrah District*: 155–157. Periodical Expert book agency: New Delhi. (010, 148)

29) **Benthall AP. 1946.** *The trees of Calcutta and its neighbourhood*: 7–15. Thacker Spink & Co., Ltd: Calcutta. (010, 027, 148)

30) **Berhaut J. 1971.** *Flore illustrée du Sénégal 1*: 293–349 [in two foregoing issues of this flora the Annonaceae are scattered over many pages]. Gouvernement du Sénégal, Ministère du développement rural, Direction des eaux et forêts. (010, 015, 027, 035, 062, 087, 118, 198, 206)

31) **Bernardi AL, Spichiger R. 1980.** Las Anonáceas del Arborétum Jenaro Herrera (provincia de Requena, departamento de Loreto, Perú). Candollea **35:** 341–383. (007, 010, 049, 055, 071, 080, 196, 206)

32) **Berry PE, Johnson DM. 1993.** A new species of *Xylopia* (Annonaceae) from Southern Venezuela. Novon **3:** 99–101. (206)

33) **Berry PE, Miller RB, Wiedenhoeft AC. 1999.** A new lightweight-wooded species of *Anaxagorea* (Annonaceae) from flooded black-water shrublands in Southern Venezuela. Systematic Botany **24:** 506–511. (007)

34) **Bisse J. 1988.** *Arboles de Cuba*: 53–60. Editorial Cientifico-Técnica: Ciudad de La Habana. (010, 080, 133, 206)

35) **Blatter E. 1930.** Revision of the flora of the Bombay Presidency. Journal of the Bombay Natural History Society **34:** 291–294. (010, 015, 048, 110, 148, 171, 172, 198)

36) **Botermans M, Sosef MSM, Chatrou LW, Couvreur TLP. 2011.** Revision of the African genus *Hexalobus* (Annonaceae). Systematic Botany **36:** 33–48. (087)

37) **Bourdillon TF. 1908.** *The forest trees of Travancore*: 3–13. Travancore Government Press: Trivandrum. (004, 023, 039, 074, 110, 113, 132, 148, 151, 171, 195, 206)

38) **Boutique R. 1951.** Annonaceae. In: Robijns W, ed. *Flore du Congo belge et du Ruanda–Urundi 2*. Bruxelles: Jardin Botanique. 256–389; pl. 224–237. (002, 010, 012, 015, 019, 026, 035, 059, 062, 064, 073, 087, 090, 115, 118, 125, 134, 135, 144, 148, 150, 151, 188, 190, 198, 199, 201, 202, 206)

39) **Boutique R. 1951.** Annonacées nouvelles de la flore du Congo Belge et du Ruanda–Urundi. Bulletin du Jardin botanique de l'État à Bruxelles **21:** 95–126; pl. 121–124. (002, 015, 019, 062, 064, 073, 090, 118, 134, 150, 151, 190, 198, 199, 206)

40) **Brandis D. 1906.** *Indian trees*: 9–22. Archibald Constable & Co. Ltd: London. (004, 007, 010, 015, 027, 039, 074, 106, 110, 113, 132, 134, 142, 148, 152, 171, 172, 195, 198, 206)

41) **Britton NL, Millspaugh CF. 1920.** *The Bahama flora*: 141–142. Published by the authors: New York. (010)

42) **Britton NL, Wilson P. 1924.** *Scientific survey of Porto Rico and the Virgin Islands 5: Botany of Porto Rico and the Virgin Islands*: 309–314. Published by the academy: New York. (010, 027, 133, 167)

43) **Britton NL, Wilson P. 1930.** *Scientific survey of Porto Rico and the Virgin Islands 6 (suppl.)*: 536. Published by the academy: New York. (010, 198)
